MICE Capabilities

Development Department

ABOUT MICE CAPABILITIES DEVELOPMENT DEPARTMENT

MICE Capabilities Development Department is determined to significantly strengthen Thailand's MICE industry through content, knowledge management, networking, and market intelligence. MICE Capability Department is committed to strengthening Thailand's MICE industry through its three strategic areas: People & Business Development and Certification; Standards for MICE Standardization; and MICE Sustainability.

The mission is to develop Thailand into the preferred MICE destination in Southeast Asia by equipping the MICE industry with standard knowledge, including personnel development and entrepreneurship in a sustainable way. In achieve this goal, TCEB is challenging Thai MICE market players to aim for and meet international standards in their operations, particularly in energy saving, food safety, contingency planning, and sustainability which has increasingly garnered global's attention in recent years. The MICE Capabilities Development department provides extensive support and resources to enable MICE stakeholders to reach optimum operational competency.

THAILAND MICE VENUE STANDARD

A PIONEERING DEVELOPMENT TO RAISE THE MICE INDUSTRY STANDARD

The primary mission of TCEB is to push forward development of the MICE industry with aim of creating continuity and sustainability. MICE industry is growing rapidly; it is becoming being increasingly focused on by business sectors at both domestic and regional levels. As such, TCEB recognises that there should be a standard tool to systematically measure the quality of venues for hosting MICE events in Thailand in order to raise standards and provide opportunities for entrepreneurs to develop their potential in terms of systematic thinking in business, management and investment, so as to ensure that operators can run MICE businesses in accordance with international standards. To this end, TCEB has developed a Thailand MICE Venue Standard (TMVS) for the first time in Thailand and the ASEAN region.

There are many advantages to adopt of TMVS. TMVS can inspire and motivate entrepreneurs and small businesses across the country and give them opportunities to develop and enhance quality of services and venues. Such tools can also expand high standard MICE events to different regions. This, in turn, can expand MICE customers into different provinces and create income distribution channels among locals.

TMVS BENEFIT FOR MICE ENTREPRENEURS

The criteria for the venue standards contain elements with 3 indicators for physical, technological and service requirements. The focus is the development of a basic standard that will be built on in order to meet the international standard in later stages. It will be beneficial to entrepreneurs in the long run because the operators who apply for the TMVS practice will have to change their entire operating process from thinking to action in accordance the guidelines

Moreover, entrepreneurs certified by TMVS will appear on the 'Approved List' and will be publicised worldwide as good venues that meet international standards. TCEB will arrange seminars explaining TMVS and demonstrating its benefits. After direct discussions with operators, majority responded that scheme is very helpful. Thai's MICE operator understood TMVS is a beneficial tool which guarantees Thailand's MICE venues are ready for international standards.

Furthermore, TMVS applies ISO quality standards of quality assessment in four main areas, including food safety standards, security system standards, business management & administration of sustainable events, and energy management standards, as well as construction and environment laws in Thailand. As such, TMVS is considered a tool to assess quality standards that have clear indicators and methods in accordance with principles and standards that are accepted worldwide.

UPGRADING THAILAND MICE VENUE STANDARD TO ASEAN

ASEAN MICE VENUE STANDARD (AMVS)

The 10 member counties of the Association of Southeast Asian Nations (ASEAN) formed the ASEAN Economic Community (AEC) in 2015, a single market and production base with free movement of goods, service, investment, skilled labour and freer flow of capital. TCEB is keen for Thailand's MICE industry to be prepared to grasp the business opportunities that will undoubtedly emerge is the AEC.

The effects of the mergence of ASEAN member countries as one AEC in the forms of expanded business opportunities and freer flows of movements of events, services, investments, and human capitals, are becoming more visible. As the hottest spot in the region, Thai MICE professionals should be able to take full advantage of the opportunities, and MICE Capabilities wishes to make it easiest for them to do so by creating an Operation Manual to assist SMEs, entrepreneurs and event planners as well as MICE training programs in preparation for the economic realities of the AEC.

During ASEAN Tourism Forum event in 2018, Tourism Ministers from 10 ASEAN countries presented TCEB with "ASEAN MICE Venue Standard" (AMVS) emblems in recognition of the organization's roles in raising Thai venue's standards to the ASEAN level. To date, 68 Thai venues have been celebrated for their first-class standards.

TMVS AND AMVS BENEFIT FOR MICE ENTREPRENEURS

Entrepreneurs certified by TMVS and AMVS will appear on the 'Approved List' and will be publicized worldwide as good venues that meet international standards. TCEB will arrange seminars explaining TMVS and AMVS and demonstrating its benefits.

Furthermore, TMVS and AMVS applies ISO quality standards of quality assessment in four main areas, including food safety standards, security system standards, business management & administration of sustainable events, and energy management standards, as well as construction and environment laws in Thailand. As such, TMVS and AMVS is considered a tool to assess quality standards that have clear indicators and methods in accordance with principles and standards that are accepted worldwide.

RAJAMANGALA UNIVERSITY OF TECHNOLOGY ISAN (NONG RAWIANG EDUCATION CENTER)

Venue Profile

Chalermprakiat Building on the occasion of the 5th Cycle Anniversary, 2nd April 2015. Inspired by Phimai city planning that was in a rectangular shape with the castle in the middle and the center of religious rituals. The building exterior was designed after the look of a brig where the body was lifted over the ground to make it look like floating on the water and the roofs were like sails moving in the wind with a layered roof design, interpolating Thai architecture both in the roof ridge and the gable-end. Additionally, the foundation was designed after the shape of lotus, expressing respect with an aura of the elevated temple hall by trying to reduce the patterns and complexities to make the building look more modern and contemporary. The building interior was at the 3-layered roofs that helped ventilate heat and air because this design allowed air to always flow through, reducing the temperature. The building decorations used local materials that were produced in Thailand with simple architectures that expressed Thai style, making the hall expressing the uniqueness of the vernacular in a contemporary style perfectly.
